

Further information

Dates

- Arrive Sunday 3 August
- Depart Saturday 9 August

A free airport pick-up service will be available at Kuala Lumpur International Airport on Sunday 3 August 2014. Please let us know in advance if you wish to take advantage of this service. The pick-up will be at 12pm only so please manage your booking and arrival to fit with this time. Should you choose to travel on your own, detailed information on how to travel from the airport to the campus is available on our website:

www.nottingham.edu.my/maps

Programme costs

The six-day programme will cost 300 USD per applicant.

The cost includes:

- all tuition and classroom support costs
- accommodation on campus for the duration of the programme
- cultural and social programme
- food during trips which are organised by the University and inclusive in the package

The cost does not include:

- return ticket to Malaysia
- food (which is very reasonably priced in Malaysia)
- accommodation and transportation for additional stay/excursions
- insurance (students coming from abroad need to sort out their own overseas travel insurance before they leave their home country)

Entry requirements

While no formal academic requirements are necessary, we welcome high school students at Year 12 and above with good English language proficiency of at least IELTS 5.5. You can either be a student from Malaysia or from an international school abroad.

How to apply

You need to complete an application form which can be found at

www.nottingham.edu.my/international/summer

Book your place as soon as possible as places are limited.

The University of Nottingham Malaysia Campus International High School Summer Programme

www.nottingham.edu.my/international/summer

About The University of Nottingham

The University of Nottingham is ranked within the world's top 1% of universities* and is recognised internationally for pioneering research and teaching excellence. Established in 1881, the University has a history of ground-breaking discoveries that have made a significant impact on the world.

Nottingham has a network of over 230,000 former students in over 190 countries. The University's alumni include top scientists, novelists, business leaders, politicians, diplomats, Olympic medalists and a Nobel Prize winner. In sharing the Nottingham experience, you are joining an extensive global network.

* QS World University Rankings 2013.

“Nottingham is the nearest Britain has to a truly global university, with campuses in China and Malaysia modelled on a headquarters that is among the most attractive in Britain...”

The Times Good University Guide 2013

An international outlook

Nottingham is an international institution with links in business, industry and education that reach around the world. The University has students from over 150 countries and two international campuses, one in China and one in Malaysia. The Malaysia Campus opened in 2000 and became the first branch campus of a British university in Malaysia and one of the first anywhere in the world. Nottingham was also the first foreign university to establish a campus in China when it opened in Ningbo in 2004. Both campuses are integral parts of the University and provide strong links between the UK and Asia.

The University of Nottingham Malaysia Campus (UNMC)

UNMC is a world-class institution providing a unique opportunity to gain a UK degree whilst studying in Malaysia. It is a full and integral part of The University of Nottingham, UK. All teaching, assessments and examinations are carried out in English.

The campus is a self-contained, self-sufficient village which overlooks scenic green hills. The range of on-campus facilities includes state-of-the-art laboratories, 24-hour computer access and an extensive library. There is also a book shop, convenience stores and a health centre. The Student Association has an indoor and outdoor food court, as well as social and learning hubs to relax around campus. There are also opportunities to get involved in clubs, societies and a range of activities in our recently refurbished sports centre.

The University is a hive of intellectual and multi-cultural interaction with around 5,000 students from over 70 countries.

Our International High School Summer Programme is a unique opportunity for you to gain first-hand experience of university life and teaching and, if you are from outside of Malaysia, the opportunity to learn about a different culture.

Academic classes

Below is an outline of the classes you will participate in during the summer school. You will take all classes but you don't need prior knowledge of the subjects – the programmes aim to give you a taster and help you choose what subject you might want to study at university or beyond. The interactive classes are taught by experienced academics and you will have the chance to use our state-of-the-art research facilities.

Faculty of Arts and Social Sciences

This programme will focus on human rights. As members of common humanity, we all enjoy these to some extent but how we experience them and what we prioritise as human rights varies greatly between different states, societies and cultures. You will be encouraged to explore your own understanding of human rights and investigate the ways in which they are promoted in different contexts.

Faculty of Engineering

The engineering part of the programme looks at how to develop a hovercraft, a machine that is capable of travelling over land, water, mud, ice and other surfaces on a cushion of air. You will learn how the machine is constructed before being put into teams to build and design your very own hovercraft for the grand race finale.

Faculty of Science

These activities will focus on interactive demonstrations and tours of our state-of-the-art laboratory facilities in subjects including:

- biomedical sciences – look at disease under a microscope
- computer science – explore how to develop your own app
- geography – investigate how to map locations from the sky
- psychology – peek into psychology and see what it's like to wear goggles that alter your visual perception!

For further information visit

www.nottingham.edu.my/international/summer

Social and cultural programme

As well as giving you a taste of the most up-to-date teaching and research, the programme offers social and cultural activities which will take you away from the classroom. These activities are the highlight of the International High School Summer Programme and will give you the chance to spend time with fellow students while exploring the local area. Activities will include:

- a tour of Kuala Lumpur and the surrounding area, taking in Putrajaya, a photo session in Kuala Lumpur city centre and a visit to the Kraftangan Centre (Cultural Craft Complex) which includes the chance to watch and participate in Batik painting
- a shopping trip to some of the major shopping malls in Kuala Lumpur

Why sign up for the International High School Summer Programme?

- Gain an insight into university study and student life.
- Learn about subjects you may not have considered studying at university.
- Meet new people from all over the world.
- Face an exciting challenge in a supportive environment.
- If you are not from Malaysia you will visit a fascinating country that you might not otherwise see.
